Phased Guidelines for Businesses to Maximize Community Health and Economic Reactivation

The Governor’s Office of Management and Budget and the Utah Department of Health with assistance from Leavitt Partners has developed recommendations to support the roadmap for reactivation of the Utah economy, while stabilizing population health. These guidelines, together with the “Milestones,” may provide appropriate flexibility for regions within the state to proactively protect public health, reactivate the Utah economy, and minimize damage to Utah’s quality of life. DISCLAIMER: These are recommendations that are subject to modification and may be superseded by county or local health department guidance.

</table>

### Retail (including Grocery Stores, Pharmacy)

- Retail establishments operate under heightened hygiene and cleaning standards. Monitor employees for symptoms.  
  - Signage to encourage customers to use cleaning wipes and hand sanitizer  
  - Ensure cleaning wipes are near shopping carts and shopping baskets  
  - Provide hand sanitizer at checkout counters and entrance/exit  
  - Wipe down reusable bags

- Retail establishments exercise discernment, establishing principles for safe environment and public trust. Monitor employees for symptoms and encourage face coverings.  
  - Encourage associates to wear face coverings and gloves  
  - Assign an employee to disinfect carts and baskets regularly  
  - Resume to normal patron capacity  
  - Provide hand sanitizer at checkout counters and entrance/exit

- Retail establishments create a safe environment for customers and staff with frequent reminders on distancing and hygiene. Monitor employees for symptoms. Employees wear face coverings.  
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including outside when in line and in store check-out lines  
  - Encourage associates to wear face coverings and gloves  
  - Assign an employee to disinfect carts and baskets after each use

### Essential Retail (e.g., grocery, hardware, etc.)

- Maintain signage to remind and help individuals stand at least 6 feet apart, including outside when in line and in store check-out lines  
- Encourage associates to wear face coverings and gloves  
- Assign an employee to disinfect carts and baskets after each use

---

1 It is not recommended that dine-in services be available under moderate risk conditions. However, if dine-in services will be opened, the following requirements are recommended.
## Normal Risk

- Set an established daily window of time for high-risk groups to come in without pressure from crowds
- Staff may only come closer than 6 feet when accepting payment or delivering goods or services (if wearing face covering)
- One-way aisles to support physical distancing
- Discourage bringing kids or strollers in stores when possible to allow as much space as possible in aisles
- Deliver products through curbside pick-up or delivery
- Make regular announcements to remind customers to follow physical distancing guidelines

### Specific Guidance for Grocery & Pharmacy

- Separate order and delivery areas to keep customers from waiting too long in confined areas together
- Take extra precautions when permitting self-serving any items that are food-related; lids for cups and food-bar type items should be provided by staff
- Only make bulk items available if they are individually packaged
- Allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees for high-risk individuals

### Hospitality, Tourism & Accommodations

- Accommodations (hotels, motels, Airbnb, etc.)
- Precaution for staff and guests

## Low Risk

- Maximum number of patrons must be such that a 6-foot distance between patrons and employees can be easily maintained (1 person per 120 square feet)
- Provide hand sanitizer at checkout counters and entrance/exit
- Limit purchase quantities on certain goods selling out quickly; this will help maintain ability to meet needs of patrons and will also help limit crowds and lines
- Set an established daily window of time for high-risk groups to come in without pressure from crowds
- Staff accepting payment or delivering goods or services are encouraged to wear a face covering
- One-way aisles to support physical distancing
- Discourage bringing kids or strollers in stores when possible to allow as much space for distancing as possible in aisles
- Consider installing a clear plastic screen between cashier and customer checking out items if it is not possible to maintain 6 feet of distance
- Deliver products through curbside pick-up or delivery
- Make regular announcements to remind customers to follow physical distancing guidelines

### Specific Guidance for Grocery & Pharmacy

- Separate order and delivery areas to keep customers from waiting too long in confined areas together
- Prevent people from self-serving any items that are food-related; lids for cups and food-bar type items should be provided by staff
- Only make bulk items available if they are individually packaged
- Do not allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees

### Specific Guidance for Grocery & Pharmacy

- Have separate order and delivery areas to keep customers from waiting too long in confined areas together
- Prevent people from self-serving any items that are food-related; lids for cups and food-bar type items should be provided by staff
- Only make bulk items available if they are individually packaged
- Do not allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees

## Moderate Risk

- Maximum number of patrons must be such that a 6-foot distance between patrons and employees can be easily maintained (1 person per 120 square feet)
- Provide hand sanitizer at checkout counters and entrance/exit
- Limit purchase quantities on certain goods selling out quickly; this will help maintain ability to meet needs of patrons and will also help limit crowds and lines
- Set an established daily window of time for high-risk groups to come in without pressure from crowds
- Staff accepting payment or delivering goods or services are encouraged to wear a face covering
- One-way aisles to support physical distancing
- Discourage bringing kids or strollers in stores when possible to allow as much space for distancing as possible in aisles
- Consider installing a clear plastic screen between cashier and customer checking out items if it is not possible to maintain 6 feet of distance
- Deliver products through curbside pick-up or delivery
- Make regular announcements to remind customers to follow physical distancing guidelines

### Specific Guidance for Grocery & Pharmacy

- Separate order and delivery areas to keep customers from waiting too long in confined areas together
- Prevent people from self-serving any items that are food-related; lids for cups and food-bar type items should be provided by staff
- Only make bulk items available if they are individually packaged
- Do not allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees

### Specific Guidance for Grocery & Pharmacy

- Only make bulk items available if they are individually packaged
- Do not allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees

## High Risk

- Maximum number of patrons must be such that a 6-foot distance between patrons and employees can be easily maintained (1 person per 120 square feet)
- Provide hand sanitizer at checkout counters and anywhere else inside the store or immediately outside where people have direct interactions
- Limit quantities on certain goods selling out quickly; this will help maintain ability to meet needs of patrons and will also help limit crowds and lines
- Set an established window of time for high-risk groups to come in without pressure from crowds
- Staff may only come closer than 6 feet when accepting payment or delivering goods or services if wearing face covering
- Discourage bringing kids or strollers in stores when possible to allow as much space as possible in aisles
- Consider installing a clear plastic screen between cashier and customer checking out items if it is not possible to maintain 6 feet of distance
- Deliver products through curbside pick-up or delivery
- One-way aisles to support physical distancing
- Make regular announcements to remind customers to follow physical distancing guidelines

### Specific Guidance for Grocery & Pharmacy

- Prevent people from self-serving any items that are food-related; lids for cups and food-bar type items should be provided by staff
- Only make bulk items available if they are individually packaged
- Do not allow individuals to bring their own bags, mugs, or other reusable items from home
- Waive prescription delivery fees

### Limited operations of this industry. Hotels and other accommodations take extreme safety precautions for both staff and guests.

- Accommodations (hotels, motels, Airbnb, etc.) operate with caution
- High touch surfaces (door handles, countertops, key cards) are sanitized frequently with EPA approved cleaners
- Maintain signage to remind groups to stand at least 6 feet apart and avoid congregating in common areas
- Symptomatic guests should stay in their room and wear a face covering when they leave
- Consider designating one staff member to attend to sick guests
## Phased Guidelines for Businesses to Maximize Community Health and Economic Reactivation

### Normal Risk
- Food should be served in a take-out style (grab and go) manner; no buffet-style dining
- Fitness centers and pools follow gym guidelines below

### Low Risk
- In-person operation of this industry is allowable for large groups. Mass gatherings follow proper safety procedures and precautions for monitoring symptoms.
- Personal Services: Industry open with strict hygiene regimen and symptom monitoring.

### Moderate Risk
- Employees working in reception areas should wear a face covering or work behind plexiglass
- Launder all exposed linens and cleaning supplies separately
- Food should be served in a take-out style (grab and go) manner; no buffet-style dining
- Fitness centers and pools follow gym guidelines below
- Discontinue or decrease housekeeping services to prevent transmission between rooms during guest stays
- Provide guests with their own sanitation solutions or wipes to instill guest confidence (e.g., alcohol wipes)

### High Risk
- Employees working in reception areas should wear a face covering or work behind plexiglass
- Launder all exposed linens and cleaning supplies separately
- Food should be served in a take-out style (grab and go) manner; no buffet-style dining
- Swimming pools, gyms and fitness centers should be closed
- Discontinue or decrease housekeeping services to prevent transmission between rooms during guest stays
- Provide guests with their own sanitation solutions or wipes to instill guest confidence (e.g., alcohol wipes)

### Events & Entertainment
- In-person operation of this industry is allowable for large groups. Mass gatherings follow proper safety procedures and precautions for monitoring symptoms.

### Concessions:
- Serving and seating protocols consistent with restaurant recommendations
- Maintain 6-foot distancing for all lines
- Encourage contactless payment
- To the extent reasonable, serve grab-and-go food items

### Personal Services
- Customers must wear face coverings and have their symptoms checked before services are rendered
- No walk-ins or waiting will be allowed; services must be rendered by appointment only
- Service provider must wear face covering and gloves, changing between each customer

### Industry open under strict hygiene protocols. Service provider and customer must wear face coverings. Meticulous monitoring of symptoms.

General Guidelines for Employers

Best Practices for Employers

- Identify a workplace coordinator who will be responsible for COVID-19 issues and their impact in the workplace.
- Encourage contactless pay options if possible; otherwise immediately use disinfectant wipes on the screen and keypad.
- Those who are, or work with, high-risk populations, should undergo daily screening/symptom monitoring, and be tested if they begin to experience symptoms. High-risk populations should take extra precaution to avoid close contact with multiple people.
- Use online conferencing, email, or the phone instead of in-person meetings, even when people are in the same building.
- Employees and customers should not congregate in groups; if your business involves a waiting area, customers should wait outside or in their cars.
- Update emergency communication plan with key contacts and backups, chain of communications, and processes for tracking and communicating; share the response plan with employees and communicate expectations.
- Ensure every employee’s contact numbers and emergency contact details are up to date; ensure a plan is in place to reach employees quickly.
- Make regular announcements to remind employees and/or customers to follow distancing guidelines and use floor markings to mark appropriate physical distance (6 feet).
- Encourage digital files rather than paper formats (e.g., documentation, invoices, inspections, forms, agendas).
- Stay informed about government and industry pandemic preparedness.
- Educate workforce about the threat of the pandemic, what the business is doing, and what they should do to protect themselves and their families.
- Develop (or engage a current) pandemic planning task force and review the CDC’s business checklist.
- Consider what reserve supplies might be necessary to stockpile (e.g., cleaning supplies, gloves or other protective equipment, “to-go” containers).
- Consider the possibility of interruptions to water or power that might force closure.
- Establish and maintain open dialogue with local communities, including key vendors and suppliers, exploring contingencies and sharing appropriate decisions about foodservice, transportation, and other services.
- Prepare for absenteeism—not only sick employees will stay home; others may need to care for the sick or children if schools close; those employees should notify their supervisors.
- Provide signage at each public entrance to inform all employees and customers that they should:
  - Avoid entering if they have a cough, fever, or feel generally unwell.
  - Maintain a minimum of 6 foot distance (10 foot distance in gyms, fitness centers, or large event spaces due to increased exertion, heavier breathing, cheering).
  - Sneeze/cough into a cloth or tissue.
  - Not shake hands or engage in any unnecessary physical contact.
  - Wear face coverings.

Cleaning & Hygiene Guidelines for Employers

- Promote etiquette for coughing, sneezing, and handwashing; avoid touching face, especially eyes, nose, and mouth; place posters that encourage hand and respiratory hygiene.
- Face coverings should be worn by employees and patrons in accordance with CDC’s recommendations, especially when difficult to maintain 6-foot distance.
- Ensure adequate air circulation and post tips on how to stop the spread of germs.
- Discourage workers from sharing resources or other work tools and equipment, when possible; avoid handshaking.
- Make a list of high-touch surfaces requiring routine disinfecting and perform routine environmental cleaning (e.g., workstations, countertops, handrails, door knobs, break rooms, bathrooms, other common areas), either twice a day or after each use. Keep a logbook of cleaning regimen. Those cleaning should:
  - Wear gloves.
  - Clean surfaces with soap and water if dirty before disinfecting.
  - Use EPA-registered household disinfectant, diluted bleach, or alcohol solutions.
- Provide disposable wipes so that commonly used surfaces (e.g., doorknobs, keyboards, remote controls, phones, desks, keypads) can be wiped down by employees before each use; provide no-touch trash bins.
- Laundry: wear gloves, use warmest appropriate water setting, dry items completely, do not shake dirty laundry, launder sick person’s items separately.
- Make hand sanitizer, soap and water, or effective disinfectant readily available at or near the entrance, at checkout counters, or anywhere else where people have direct interactions. Provide additional pop-up handwashing stations or facilities if possible (e.g., showing houses, construction sites).
- Personal Protection Equipment (PPE) should not be shared and should be disposed of properly.
- After using gloves, employees should wash their hands.

Employers Monitoring Symptoms

- Employees who are sick or who appear to have symptoms should be separated from other employees and customers immediately and sent home; immediately clean and disinfect areas the sick employee visited.
- Monitor employee symptoms, especially fever. If employees need to take simple medications acetaminophen, ibuprofen, or aspirin, they should take temperature beforehand.
- Train managers/leadership to spot symptoms of COVID-19 and to be clear on relevant protocols.
- Do not allow employees to come to work if they feel sick; non-punitive leave policies are in place so employees do not feel pressured to come to work if they are sick. Remind employees to report any illness to manager, especially if sick with fever, cough, muscle aches and pains, sudden changes in smell or taste, sore throat, and/or shortness of breath.
- If an employee is confirmed to have COVID-19, employers should inform fellow employees while maintaining confidentiality; fellow employees should self-monitor for symptoms for 14 days.

<td>1 2 3 4 5 6 7 8 9 10</td>
<td>1 2 3 4 5 6 7 8 9 10</td>
<td>1 2 3 4 5 6 7 8 9 10</td>
<td>1 2 3 4 5 6 7 8 9 10</td>
</tr>
<tr>
<td>Routine access and visitation. Routine infection precautions.</td>
<td>Reduced entrances. Enhanced infection precautions. Health screen of all patients and visitors. Face masks for staff, providers, and visitors encouraged. Face masks for symptomatic patients.</td>
<td>Restricted entrances. One visitor per patient with limited exceptions. Elevated infection precautions; face masks for all staff, providers, patients and visitors. Temperature check and health screen of all visitors and patients. Phase in provider and staff temperature and health screening.</td>
<td>Single entrance. No visitors with few exceptions. Elevated infection precautions; mandatory face masks for all staff, providers, patients and visitors. Temperature check and health screen of all staff, providers, patients and visitors.</td>
<td></td>
</tr>
<tr>
<td><strong>Outpatient</strong></td>
<td>Routine outpatient visits with routine infection precautions. Telehealth visits optional. Manage lower risk medical and surgical patients through home care. COVID testing in-office. Antibody testing as indicated.</td>
<td>Encourage telehealth when possible instead of in-person visits; convert respiratory patients to telehealth when possible or use cohorting for in-person visits. Outdoor location for COVID testing when possible. Limit use of waiting areas to maintain physical distancing. Manage lower risk medical and surgical patients through home care. Face masks and eye protection for patient-facing staff. Mandatory face masks for symptomatic patients. Face masks encouraged for patients and visitors. Antibody testing for broader group of critical infrastructure workers and community members.</td>
<td>Yellow conditions plus: Convert non-essential in-person visits to telehealth or defer in-person care that can be safely postponed. Encourage increased use of home care to avoid nursing facilities and admissions. Face masks for all non-patient facing staff, and face masks and eye protection for all patient-facing staff. Mandatory face masks for symptomatic patients. Antibody testing for critical infrastructure workers.</td>
<td>Orange conditions plus: Face masks strongly encouraged for patients and visitors, mandated where possible based on PPE supplies.</td>
</tr>
<tr>
<td><strong>Surgery/Procedures</strong></td>
<td>Outpatient and inpatient surgery/procedures proceed when immune status is known or pre-procedure COVID testing is performed. Postpone COVID-positive and COVID-suspected patients if risk of delay is low.</td>
<td>Surgery/procedures proceed only if reliable COVID testing is available and state-wide critical resources are clearly sufficient. Patient acuity drives prioritization when resources are limited. Postpone COVID-positive patients if risk of delay is low.</td>
<td>Perform emergent and urgent surgery/procedures with rapid COVID testing where available, and time-sensitive surgery/procedures that require a hospital stay if delay will result in increased risk of patient harm or death. Outpatient elective surgery/procedures for low risk patients may proceed when reliable COVID testing is available and state-wide critical resources are clearly sufficient. Patient acuity drives prioritization of surgery. Postpone procedures on COVID+ patients if risk of delay is low.</td>
<td>Perform emergent and urgent procedures with rapid COVID testing where available, and some time-sensitive surgery/procedures where a delay will result in increased risk of significant patient harm or death. Patient acuity drives prioritization of time-sensitive surgery, accounting for state-wide critical resource capacity.</td>

Appendix: Guidelines for Dine-in Restaurants Open in “Moderate”

Distance Between Patrons

- Limit tables to groups of 6, preferably members of the same household
- Tables with guests must be at least 10 feet apart, from corner to corner. Either move tables or mark off tables not to be used
- In waiting areas, 6-foot distance must be maintained between household parties, indoor or outdoor
- Hosts preferably open doors for customers and guide them to their seats to prevent traffic or contamination; hand sanitizer should be available outside of door

Hygiene Practices

- No self-serve food service or buffet options unless food is pre-packaged
- The restaurant may not operate if PPE, EPA-approved disinfectants and sanitizers, soap, and other necessary cleaning supplies are not available
- Cleaning supplies must be single use (paper towels, disposable mop heads, etc.) or laundered between every use (dishcloths, mop heads, etc.)
- Hand sanitizer must be available immediately outside of bathrooms
- Require the restaurant to be closed for cleaning in the morning, afternoon, and evening. Cleaning includes all tables, chairs, door handles, floors, bathrooms, and any high-touch surfaces

Guidance for Working with Customers

- Consider offering specific hours of operation for high-risk individuals
- Hosts point guests to signage that includes the following information:
  - Outlines symptoms and encourages that if the patron, or someone they live with, has experienced COVID-19 symptoms, please order takeout instead
  - Recommendation for high-risk individuals to do takeout/delivery instead of dine-in to protect the high-risk individual’s health (“High-risk individual” includes those over 65, those living at senior living facilities, and those of all ages with underlying medical conditions, including chronic lung disease, asthma, heart conditions, severe obesity, chronic kidney disease, liver disease, or otherwise immunocompromised (undergoing cancer treatment, smoker, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications)
